

REMARKS

As the Examiner is aware, this case is part of an original “bulk filing” by Motorola. Special IDS procedures have been approved for these cases, and in this case several 1449’s have kindly been considered. A supplemental IDS filing is also included with this filing.

Applicants appreciate the indication of allowable subject matter. In this regard, Applicant has presented new claims based on allowable claim 43, but not including the processing limitations present in (now cancelled) amended Claim 1. The processing limitations have been eliminated from the main claim because of the statement in the Official Action that these limitations do not change the structure searched by the Examiner. However, certain process limitations do appear in the dependent claims, and these limitations describe unique features of the invention that must be considered post-issuance, for example when infringement and validity questions arise. Regardless, these claims depend from allowable Claim 44 and thus are themselves allowable.

Applicants note that there is an outstanding double patenting issue, currently kindly being held in abeyance by the Office. Once this case is deemed allowable in total, Applicants will address any remaining double patenting issue. Accordingly, early notice to this effect is respectfully requested.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,
MAIER & NEUSTADT, P.C.
